The Breeder and the Purchaser are in agreement on the following;

These kittens from Badgerrags Cattery are raised in our home and unafraid here, it will take a few days in your home for them to become the sweet kitten you visited here. Keep it in the bathroom or a small room to get used to you and your home, find the forever location for the litter box, don't move it around, make gradual changes for the kitten.

During the first 72 hours the kitten should be isolated from any other pets and monitored for health, eating, litter box usage and activity level. The seller is not responsible for any injury or illness to other pets caused by exposure to this kitten. Do not make drastic changes to the food. Do not buy grocery store cat food, do not buy adult cat food, this is a kitten. Make food changes a teaspoon at a time, I prefer you stay with Royal Canin for the 1<sup>st</sup> 6 months of the kitten's life. Look on the Internet at cat food sites to choose a good food. I am trying Darwin's raw cat food for my older cats now. Shop Hollywood Feed if it is close. Nothing from China.

If you find it necessary to use flea protection on this kitten use **Revolution**. I would not use toxic products you may find at the grocery store for anything, ask the vet if needed. Your Veterinarian will answer questions about the future worming procedure for your kitten, I like the Strongid or Pyrantel wormer and I hope you **worm at least 2 times a year**. Don't use **Ketamine** Anesthetic on your Ragdoll, ask the vet before any procedure what he uses. I have been advised against the FIP shots and the Feline Leukemia shots, don't get them. **There is no cure for FIP, don't ever get FIP shot. Call me!**

Purchaser is aware that the kitten will be available approximately 12 to 13 weeks of age, no sooner. The kitten will be neutered or spayed prior to going to your home. The kitten will have the age appropriate vaccinations (**FHCPCh**) This vaccine protects cats against common upper respiratory diseases such as Rhinotracheitis, Panleukopenia, Chlamydia, Calicivirus. **Even indoor cats need to be vaccinated**. You will be responsible for the last booster vaccination at 16 weeks of age with your veterinarian. **The vaccination at sixteen weeks of age is the most important vaccination of all**. In my opinion, get the booster in a year then every year thereafter until it is older. People could track in a virus. Breeder will provide all accurate and true veterinary records of the kitten at time of pickup.

Kitten is guaranteed to be in good health upon pickup, free of internal and external parasites and LEUK\FIV. The purchaser is advised to have the kitten examined by your own veterinarian within 72 hours to confirm its good health. If any health concerns are found the purchaser may return the kitten to the seller within 72 hours with a written explanation from the attending veterinarian. No medical or travel expenses will be reimbursed, seller will replace the kitten or reimburse the purchaser for the amount paid for the kitten. We will not be responsible for any illness (non-genetic) found after 72 hours of pickup when kitten was purchased from seller.

If the kitten dies within the first year of life due to an inherited genetic disease buyer must inform seller and provide a necropsy of that kitten from a certified veterinarian. Kitten has a 2-year genetic health guarantee against any hereditary or congenital genetic defects, including FIP. The necropsy must clearly state in writing the certain congenital or genetic defects of the specific kitten for the breeder to replace the kitten. It is not the breeder's responsibility to pay for the vet bills or the loss of the kitten from anything that is not congenital or hereditary. If the kitten dies from anything else that is not hereditary or congenital defects such as wrong vaccination, sickness not present at time of first 72 hour check up by your vet after pickup, breeder assumes no responsibility. Meaning breeder will NOT refund any money for your vet bills. Seller would replace kitten if it is found to have a hereditary defect and after many test procedures to prove the defect was hereditary or genetic after the necropsy. **You must have the kitten examined by your vet within 72 hours after pickup for the above to be valid.** Breeder agrees that the kitten is from two DNA tested (Optimal Solutions Genetic Testing) parents.

Purchaser agrees **NEVER** to allow the kitten to roam freely outdoors, kitten will be kept indoors. Purchaser agrees **NOT** to have kitten declawed at any time during its life. This procedure is VERY painful and causes discomfort for the rest of the cat's life. Declawing causes severe physical pain and suffering by taking the first toe joint off, this extreme pain possibly causes neurological damage such as aggressive behavior, biting, going outside of the litter box or on furniture. If the cat is found to be declawed the purchaser will surrender the cat back to the breeder.

Purchaser agrees by signing this agreement that this is a live animal they are purchasing. There is no guarantee that this kitten may not scratch or bite the purchaser or a child, it is impossible to predict the behavior of an animal if it feels threatened or afraid. Seller cannot guarantee all behavior of the kitten, we socialize them to the best of our ability.

Purchaser will be provided with the Litter Registration Certificate from TICA. **It is your responsibility to register your kitten with TICA with the certification provided by the Seller/Breeder.**

This sale is in the State of Texas, all legal issues, if any, will be as per Texas State Law. Any court proceedings will be brought in the County of Denton, State of Texas. All legal fees and court costs used to enforce this contract will be paid by the purchaser, including the seller fees or costs. By signing this agreement, the purchaser agrees to these terms.

Seller/Breeder and Purchaser agree, this is the Whole Agreement between the Purchaser and the Seller/Breeder.
