The Breeder and the Purchaser are in agreement on the following;

These kittens from **Badgerrags Cattery** are raised in our home and unafraid here, it will take a few days in your home for them to become the sweet kitten you visited here. Keep it in the bedroom or bathroom, until it keeps using the litter box. Find the forever location for the litter box, don't move it around, always make gradual changes for kitten. 2 Story – 2 litter boxes.

During the first 72 hours the kitten should be isolated from any other pets and monitored for health, eating, litter box usage and activity level. The seller is not responsible for any injury or illness to other pets caused by exposure to this kitten. Do not make drastic changes to the food. Do not buy grocery store cat food, do not buy adult cat food, this is a kitten. Make food changes a teaspoon at a time. I prefer you stay with Royal Canin Mother & Babycat canned and Dry food. Not the Kitten, it has Cellulose....stay with the above food for the 1<sup>st</sup> 8 months of the kitten's life. Try and use filtered water. I use **Acana or Orijen Dry food when older. Check out cat food RECALLS**

In the future, if you use flea protection on this kitten use **Revolution**. I would not use toxic products you find at grocery store. Your veterinarian will answer questions about the future worming procedure for your kitten. I like the Strongid or Pyrantel wormer and I hope you **worm at least 2 times a year**. Don't use **Ketamine** Anesthetic on your Ragdoll, ask the vet before ...any procedure ...what anesthetic he uses. I have been advised against the FIP shots. **There is no cure for FIP, don't ever get FIP shot. Do not get the Leukemia/FIV Vaccination, they don't need it...Call me!**

Purchaser is aware that the kitten will be available approximately 12 to 14 weeks of age, no sooner. The kitten will be neutered or spayed prior to going to your home. The kitten will have the age appropriate vaccinations (**FHCPCh**) This vaccine protects cats against common upper respiratory diseases such as Rhinotracheitis, Panleukopenia, Chlamydia, Calicivirus. **Even indoor cats need a booster every year for first few years.** People could track in a virus. Calicivirus lives 18 hours possibly on your shoes, don't let them play on your shoes. Breeder will provide all accurate and true veterinary records of the kitten at time of pickup. **Check your Microchip address at the vet, make sure it is YOUR ADDRESS!!**

Kitten is guaranteed to be in good health upon pickup, free of internal and external parasites and LEUK\FIV. **The purchaser is advised to have the kitten examined by your own veterinarian within 72 hours to confirm its good health.** If any health concerns are found the purchaser may return the kitten to the seller within 72 hours with a written explanation from the attending veterinarian. No medical or travel expenses will be reimbursed, seller will replace the kitten or reimburse the purchaser for the amount paid for the kitten. We will not be responsible for any illness (non-genetic) found after 72 hours of pickup when kitten was purchased from seller.

If the kitten dies within the first year of life due to an inherited genetic disease buyer must inform seller and provide a necropsy of that kitten from a certified veterinarian. Kitten has 3-year genetic health guarantee against any hereditary or congenital genetic defects, including FIP. The necropsy must clearly state in writing the certain congenital or genetic defects of the specific kitten for the breeder to replace the kitten. It is not the breeder's responsibility to pay for the vet bills or the loss of the kitten from anything that is not congenital or hereditary. **If the kitten dies from anything else that is not hereditary/congenital defects such as FIP or Leukemia vaccinations, or sickness not present at time of first 72 hour check up by your vet after pickup, breeder assumes no responsibility.** Meaning breeder will NOT refund any money for your vet bills. Seller would replace kitten if it is found to have a hereditary/congenital defect and after test procedures to prove the defect was an inherited of genetic disease after the necropsy. **You must have the kitten examined by your vet within 72 hours after pickup for the above to be valid.** Breeder agrees that the kitten is from two DNA tested (Optimal Solutions aka Wisdom Panel Genetic Tested) parents.

Purchaser agrees **NEVER** to allow the kitten to roam freely outdoors, kitten will be kept indoors. Purchaser agrees **NOT** to have kitten declawed at any time during its life. This procedure is VERY painful and causes discomfort for the rest of the cat's life. **Declawing** causes severe physical pain and suffering by taking the first toe joint off, this extreme pain possibly causes neurological damage such as aggressive behavior, biting, going outside of the litter box or on furniture. If the cat is found to be **Declawed** the purchaser will surrender the cat to breeder.

Purchaser agrees by signing this agreement that this is a live animal they are purchasing. There is no guarantee that this kitten may not scratch or bite the purchaser or a child, it is impossible to predict the behavior of an animal if it feels threatened or afraid. Seller cannot guarantee all behavior of the kitten, we socialize them to the best of our ability.

Purchaser will be provided with the Litter Registration Certificate from TICA. **It is your responsibility to register your kitten with TICA with the certification provided by the Seller/Breeder. The enclosed Litter Certificate number is provided for the purchaser.**

This sale is in the State of Texas, all legal issues, if any, will be as per Texas State Law. Any court proceedings will be brought in the County of Denton, State of Texas. All legal fees and court costs used to enforce this contract will be paid by the purchaser, including the seller fees or costs. By signing this agreement, the purchaser agrees to these terms.

Seller/Breeder and Purchaser agree, this is the Whole Agreement between the Purchaser and the Seller/Breeder.
